- ▶ Export Presentation to PowerPoint

Exhibit A is the parent company to **Visionary Legal Technologies**, the developer of leading trial presentation and discovery management software.

DWI Video Presenter (DVP) ***Designed Specifically for DWI Trial Attorneys***

By using the video files from the police dashboard camera, in-car video and in-station video, Exhibit A will deliver to you a synchronized video transcript viewer called the **DWI Video Presenter (DVP)**.

The **DVP** allows users to easily create and present video clips along with associated exhibits, by searching and selecting key text. The resulting clips can be used to prepare and present your case.

The **DVP** includes:

1. A digital MPEG1 video file
2. A text transcript of the conversation and interrogation of the videos
3. Synchronized video and transcript
4. Scanned and hyperlinked documents/exhibits used during the video

The **DVP** does not require you to purchase any software. Simply insert the **DVP** disk into your PC or laptop and you will have the multimedia technology at your fingertips.

The standard price is \$350 per **DVP**. Discounts are available on multiple **DVPs**. Contact us today to learn more and order your first **DVP**.

Please note: the standard price assumes one hour of clear dialogue. Significantly longer video or poor audio quality may have additional costs. The creation of a DVP normally takes ten business days.

Present Your Best Case with the DWI Video Presenter.
